SPAIN

VENTURA GARCÉS & LÓPEZ-IBOR ABOGADOS

- Monetary stability since Spain uses the euro (€) as legal tender, a hard currency which protects non-Spanish investors from foreign exchange risk and investment depreciation.
- The life style in Spain is very positive. Spain is the sunniest country in Europe and its climate is among the healthiest in the world. The average temperature is approximately 20 degrees Celsius. The average life expectancy is 83,2 years, the second highest life expectancy in the world after Japan (83,4 years) according to the figures released recently by the OECD.
- Law and order: Spain's crime rate in 2014 was among the lowest in Europe: 45.1 per 1000 persons compared to 96.8 per 1000 in Belgium and 79,00 per 1000 in Denmark, for example. Only Portugal and Greece have lower rates.
- Spain has achieved high economic growth in 2017 and before (3.7%) Spain has a domestic market of approximately 48 million consumers as of December 2017.
- Spain has quite a tolerant immigration legislation. Foreign employees are subject to the same labour regulations as Spanish employees. However, foreign employees, if they are not nationals of EU or EEA member countries, must have a work and resident authorization to legally work or live in Spain. In spite of this, Spain has a "golden visa" system in order to grant residency permits for those buying Spanish properties or Spanish public debt or generally making direct investments in Spain.
